Brandon, FL

Education

- B.A.S. of Software Development at St. Petersburg College Graduation: July 2027
 - GPA: 3.62 (Presidents Honor List for Summer 2026)

Experience

Full-Stack Software Engineer at Sandman Shop (Largo, FL) *March 2026 - Present*

- Developed an e-commerce website using Angular, TypeScript, JavaScript, HTML, and CSS in a GCP environment, to migrate from third-party marketplaces to improve profit margins.
- Automated security testing by integrating Codex into CI/CD processes for REST API requests and authentication, helping protect customer accounts and transaction data.
- Reduced page load times by 2 seconds after noticing slow performance, using Sharp, Node.js, Express.js, and MongoDB to compress and manage storage for faster browsing.

Software Engineer Intern at FitMirage (Remote) *Dec 2025 – March 2026*

- Contributed to building a unified web and mobile platform using React, React Native, TypeScript, HTML, CSS, and Node.js, enabling outfit planning and virtual try-on capabilities.
- Collaborated with cross-functional agile teams throughout the software development lifecycle (SDLC), on code reviews, sprint planning, and iterative software releases on Git and GitHub.
- Translated Figma designs into responsive interfaces with Tailwind CSS and reusable components, providing a consistent experience across devices.

Software Engineer Intern at Revelation Gold Group (Remote) *Oct 2025 – Dec 2025*

- Increased subscription conversions by 20% by creating a modal popup using JavaScript, HTML and CSS, to simplify the enrollment process for investors.
- Redesigned the company's website by building 8 new pages, integrating 40+ features, and revising the entire user interface and user experience (UI/UX) for improved usability.
- Optimized software releases through CI/CD pipelines and Vercel deployments, delivering financial services features and updates to IRA account holders faster.

Skills

HTML, CSS (Tailwind), JavaScript, TypeScript, Angular, React, Next.js, React Native, Node.js, Express.js, Git, GitHub, Google Cloud Platform (GCP), MongoDB, Docker, Vercel, Codex, Figma
